Event Type: Encryption and Decryption
Event Name: The Upside Down

EVENT FLOW:
- **OBJECTIVE**: Words encrypted using cryptography algorithms should be decrypted by the participants
- **TEAM COMPOSITION:** Each team should consist of **maximum two members.**

ROUND 1:
- The participants will be given encrypted words which should be decrypted using the given clue.
- The decrypted words will provide the clue for the next round.
- Participants are shortlisted based on the time constraint.

ROUND 2:
- Participants should decrypt the given sentences using the clue they decoded from the first round.
- Participants are again shortlisted based on the time constraint.
- No separate clue will be given in this round.

ROUND 3:
- Participants should decrypt the given paragraph using the clue they decoded from the second round.
- No separate clue will be provided.
- The winners are chosen based on the time constraint.

TIE BREAKER(Only for Round 3):
- In case of tiebreaker , an encoded question will be given, the first one to decode and answer the question will be the winner.

WINNING CRITERIA:
The top three teams with the lowest amount of time taken to decode the words will be declared as winners.

Event Guidelines:
- No gadgets will be allowed.
- **Answers** found by the teams must be recorded and informed **only to the event volunteers.**
- Answer sharing and switching of team members is not allowed.
- Any **instance of misconduct** will result in **immediate disqualification** from the event.
- Teams can have participants from different institutions.
- The Judge's decision is final.
